

APRIL NEWSLETTER

MAKING LEMONADE

There is nothing more fun for children than working with their hands and making something. The tiny tots squeezed lemons and poured the juice into a pitcher of water. They added sugar and stirred the mixture to prepare the lemonade. Our curious little learners not only described the yellow lemons but also experienced the difference between sweet and sour. They learned new words during the activity. The children also learnt how much pressure has to be applied to squeeze the juice out of lemons.

BAISAKHI

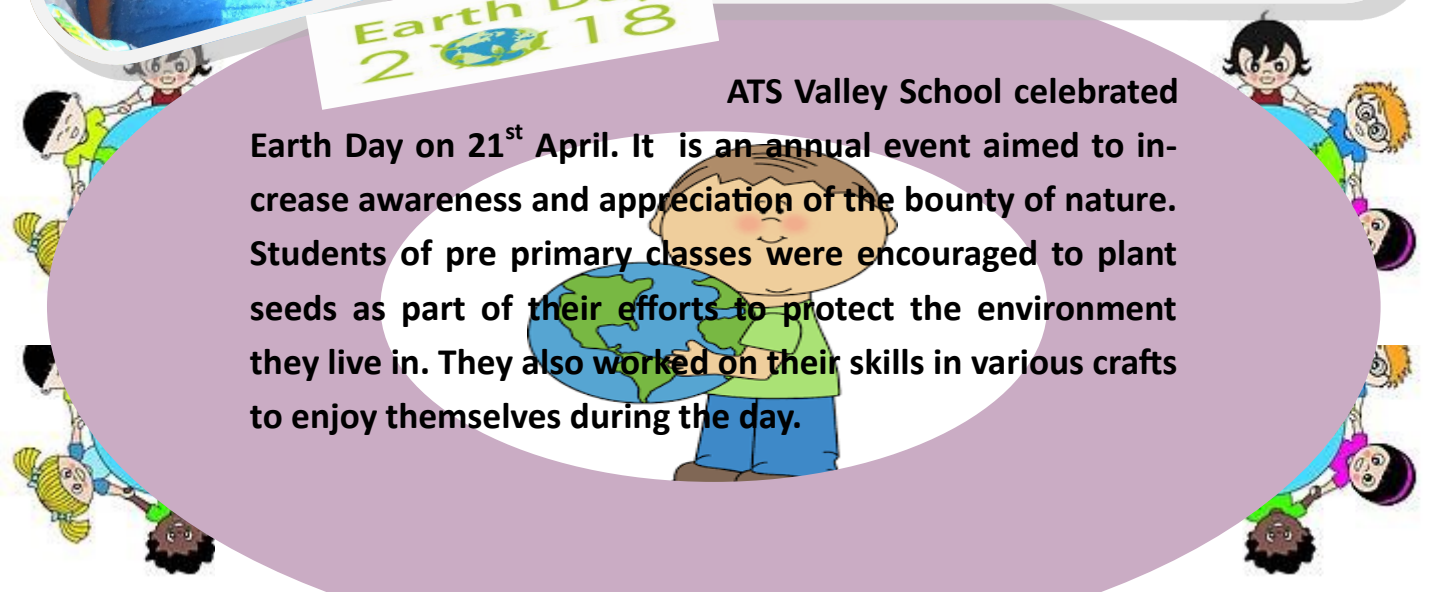

Students of Grade 1 to 10 of ATS Valley School celebrated Baisakhi with great enthusiasm. The children of Grade Foundation, dressed in colorful traditional Punjabi outfits, were a visual delight. The purpose was to make the students aware about the historical background, significance and relevance of the festival of Baisakhi.

SPLASH POOL

A splash pool which is the perfect way to have some fun while indulging in water play was organized for our tiny tots. This activity helps the young ones to strengthen their sense of physical balance. It fosters social and emotional growth in them as they interact with each other in a playful, carefree manner. The kids dressed in their colorful swim wear and splashing around in cool water were a sight to behold.

ATS Valley School celebrated Earth Day on 21st April. It is an annual event aimed to increase awareness and appreciation of the bounty of nature. Students of pre primary classes were encouraged to plant seeds as part of their efforts to protect the environment they live in. They also worked on their skills in various crafts to enjoy themselves during the day.

ICE CREAM CRAFT

April marks the beginning of a new session at school and also the onset of the summer season. It is the perfect time to get preschoolers ready to learn. Ice cream is not just the perfect treat but is also simple, pure fun for the kids. They love making a mess while eating it; it is delicious and helps beat the heat. The tiny tots of Grade Foundation had fun making ice cream crafts this month and the activity was conducted to enhance their imagination and to teach them how to improvise.

FOOTPRINTS

What better keepsake to have for the first day of school than some hand print and footprint art! We thought this would be the perfect activity for our Foundation kids and they were immensely delighted to be a part of it.
